CARMENTA

The Wellness Industry
founded in 1949

1949

2024

"Ours is not only a great company but also a great family"

Evaristo Costacurta and Bianca Ortolani, the founders of the Carmenta company.

OUR MISSION

To create technology and exceptional tools that promote personal well-being. By combining technological innovation and craftsmanship, we build unique and personalized solutions entirely in-house, strictly Made in Italy, transforming every space into an oasis of serenity and health.

OUR VISION

To become the global benchmark in the wellness sector. With unparalleled dedication to artisanal quality and technological innovation, we strive to bring Italian wellness worldwide, making every wellness experience an unforgettable journey towards relaxation and rejuvenation.

OUR TERRITORY

The Territory of Carmenta: Veneto

Carmenta is deeply rooted in Veneto, in the heart of Northeastern Italy, a region renowned for its rich manufacturing tradition and culture of innovation. Veneto is a land of excellence, combining a unique historical heritage with modern entrepreneurial dynamism.

This region is the cornerstone of our commitment to quality and Italian craftsmanship. The natural beauty of the territory and the focus on the environment constantly inspire our wellness solutions, integrating tradition and technology to create exclusive products that reflect Italian elegance and excellence.

Veneto is not just our place of origin but also an endless source of inspiration, from the Dolomites to the Adriatic Sea and Lake Garda, guiding us in our mission to enhance people's well-being through innovative and sustainable solutions.

Dear Colleagues, Partners, and Clients,
 It is with great pleasure that I welcome you to the world of Carmenta. Since our founding in 1949, our commitment to innovation and quality has allowed us to grow and become a leader in the wellness and luxury sectors. Our goal is simple: to create wellness spaces that improve people's quality of life. With cutting-edge solutions for saunas, steam baths, and spas, we serve private individuals, businesses, and the marine sector, always with a focus on sustainability. We look to the future with enthusiasm, ready to achieve new milestones together with you. Thank you for your trust and support.
 Kind regards,
 Sergio Costacurta
 CEO, Carmenta Srl

OUR HISTORY

Carmenta Srl was founded in 1949 by Evaristo Costacurta and Bianca Ortolani in Carmignano di Brenta, in the heart of Northeastern Italy. Initially specializing in bathroom furniture, the company played a significant role in the international market.

In the 1980s, Carmenta worked closely with architects and designers to offer exclusive materials and collections. Since 2002, the company has focused on the wellness sector, developing innovative materials resistant to high temperatures and humidity, ideal for spas and wellness centers.

In 2005, Carmenta established an in-house design studio, increasing the production of saunas and steam baths. In 2014, the Wonder model was introduced, an integrated wellness cabin that combines heat, steam, and water.

In 2017, Carmenta entered the marine sector, producing A60 class saunas and steam baths for large yachts. Today, Carmenta is an international company with teams across various continents, recognized as a leader in hotel contracts, professional wellness, and marine sectors.

CARMENTA
 THE WELLNESS INDUSTRY

OUR PRODUCTION

Carmenta è un leader nel settore wellness, combinando innovazione tecnologica e artigianalità Made in Italy. Ogni fase della produzione, dalla progettazione alla realizzazione, è condotta internamente nei nostri stabilimenti di 7000 mq per garantire qualità e personalizzazione. Utilizziamo materiali eco-sostenibili e tecniche avanzate per produrre saune, bagni turchi, cabine multifunzione e Home SPA. Collaboriamo con architetti e progettisti per creare soluzioni esclusive, realizzate con precisione e cura artigianale. Ogni prodotto è prefabbricato, montato e collaudato in stabilimento per assicurare la consegna di prodotti efficienti e duraturi, riflettendo l'eccellenza del Made in Italy.

OUR PRODUCTION PROCESS

Design and Manufacturing

Carmenta excels in wellness by combining advanced technology and Italian craftsmanship. We manage every production phase in-house, ensuring quality and customization. Collaborating with architects, we create saunas, steam baths, and Home SPA using eco-sustainable materials. Our products reflect the excellence of Made in Italy.

Sauna Production

Our saunas are made with eco-sustainable materials and cutting-edge techniques, ensuring a perfect blend of tradition and innovation.

Steam Bath Production

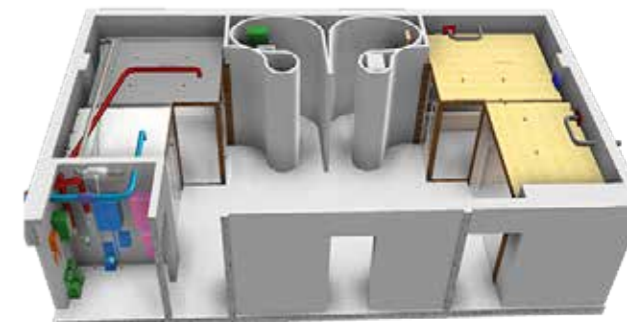

Carmenta has revolutionized steam bath production using high-performance recycled materials like PET, all processed in our facilities. These steam baths are prefabricated and ready for installation, significantly reducing on-site assembly time.

Wellness Center Construction

Building a Carmenta wellness center perfectly combines tradition and innovation, tailored to the client's and designer's wishes. The process begins with plumbing, electrical, and masonry setups, followed by material and finish installations. The final phase includes testing the cabins and technologies, ensuring product quality, and providing training to client operators for daily activities.

Made in Italy

All Carmenta products are proudly made in Italy. Designed, engineered, and handcrafted in our Carmignano di Brenta facility, our products embody Italian excellence. Our team of engineers and architects develops all technologies and projects, aligning with market and client specifications. This dedication allows us to offer exclusive solutions that reflect Italian quality and innovation.

OUR TECHNOLOGY

Carmenta has developed the Genius Spa Control system, an advanced solution for managing wellness areas. This system allows remote control of all spa functionalities via computer, tablet, or smartphone, enhancing energy efficiency and simplifying operations. Key features include attendance control, load management, energy consumption, aromas, temperature, lighting, music, and remote diagnostics. Genius Spa Control is flexible, intuitive, and does not require on-site personnel for monitoring and maintenance.

OUR INNOVATION AND SUSTAINABILITY

Carmenta integrates innovation with Italian craftsmanship, ensuring high-quality and high-performance products. In the wellness sector, our tests have shown thermal insulation up to 150% superior, leading to energy savings of over 50%. Additionally, Carmenta products have a strong ecological and eco-friendly component.

OUR PRODUCTS FOR COMMERCIAL

Carmenta offers professional wellness solutions designed for hotels, resorts, spas, and wellness centers. We use eco-friendly and sustainable materials to create Finnish saunas, bio saunas, salt saunas, herbal saunas, infrared cabins, steam baths, hammams, and more. Each product is customizable to ensure a luxurious experience with advanced functionality.

Our solutions, born from Italian craftsmanship and technological innovation, create spaces that promote the psycho-physical regeneration of clients. They elevate the level of wellness in professional settings, ensuring high performance and lasting satisfaction over time.

MARINE

Carmenta stands out in the marine sector by offering custom wellness solutions for yachts and ships, integrating cutting-edge technology and refined design. Our saunas, steam baths, hammams, and infrared cabins are designed to meet the specific needs of luxury vessels.

With a strong focus on safety, we use A60 class certified materials, ensuring protection and quality. Our customizable and innovative solutions transform each yacht into a wellness oasis, providing a unique luxury experience at sea.

We collaborate with leading shipyards and owners to create wellness spaces that perfectly integrate into yachts, offering the perfect blend of Italian craftsmanship and advanced technology. Our expertise in the marine sector allows us to deliver exclusive projects that elevate on-board wellness standards.

CUSTOM SAUNA IN CLASS A60

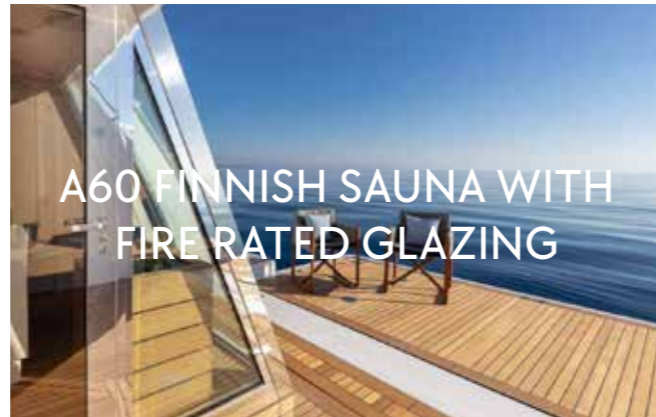

Carmenta has developed a custom Finnish sauna in A60 class, designed for naval use within yachts. Constructed with A60 class steel sheet panels, internally lined with wood, it ensures 60 minutes of fire safety. The design includes a front with a glass door, offering transparency and a panoramic view, maintaining luxurious aesthetics and a scenic atmosphere, perfectly integrated into the environment of luxury yachts.
